**Bachelor of
Jewellery
Design +
Technology**

Qualification

Level 7 / 360 credits

Duration

3 years

Delivery

On campus

Location

Auckland Central

Next intakes

February + July

FASHION

At Whitecliffe's Bachelor of Jewellery Design + Technology - Aotearoa New Zealand's only dedicated jewellery degree - you don't just learn to make beautiful pieces - you'll discover how to create meaning and tell stories.

You craft work that's unmistakably - uniquely-yours.

Over three years, and within a **studio workshop** you will learn everything from **traditional techniques** to current **CAD technology**. You'll master both **heritage craftsmanship** and **contemporary innovation**. You'll create **from concept to completion** among supportive faculty and surrounded by your peers. Working at **dedicated jeweller's benches**, you'll develop all the technical skills and creative vision needed to stand out in a field where authenticity matters above all else.

We're one of Aotearoa New Zealand's most recognised and respected art schools. And we're proud of that - and especially proud to offer this programme.

But this flyer is just a taster of what's on offer.

If you want any more information - please pick up a prospectus or you can book a tour or apply online.

If you have any questions - **give us a call**.

Applications are now open.

We understand uniqueness.

We help you find it.

We help you create it.

Because we already know you have it.
