February + July

Learn the fundamentals of jewellery design

Certificate in Jewellery

Designed as an informative and practical starting point for learning about the manufacturing process of jewellery, this programme incorporates both general theory and practice. Hands-on tasks include dimensions, marking out, forming, filing, soldering, making settings, cutting stone holes, back holes, and polishing to achieve filing designs, band ring designs, and mount designs.

Graduates of this programme will be able to

- Execute jewellery fabrication techniques
- Create additional dimensions to work
- Understand culturally safe work practices

Further study options

Level 7 Bachelor of Jewellery Design and Technology

Career opportunities

- Junior Jewellery Assistant
- Apprentice
- Bench Hand
- Maker in associated creative industries
