Qualification

Level 8 / 120 credits

Duration

8 months

Delivery

Distance + some
in-person seminars

Location

Auckland Central
Auckland Manukau
Christchurch

Next intakes

July + November + March

In an industry where technology evolves faster than ever the Postgraduate Diploma in Information Technology at Whitecliffe is where your innovation meets your expertise.

This **eight month** long programme isn't limited to code or systems.

It is inspired by our artistic heritage as much as by our tech mātauranga - you're challenged to craft **IT solutions** that are imaginative as well as effective-solutions that make a difference. Yes, we're known as one of Aotearoa New Zealand's most recognised and respected art schools - but that isn't where our limits sit.

It isn't a weakness- it's how we help you think more sharply and creatively about what technology can do. You'll strengthen your foundation with **research and technology management**, then build your path with specialist electives- from **Cyber Security** to **Data Science**, **Machine Learning**, and more. Every course sharpens your skills with confidence and creative flair.

Flexible problem solving is mirrored by **flexible blended delivery** - which means you can study online and at your own pace, complemented by on-campus seminars to suit your work or life commitments. This programme is for you - whether you're new to IT or already a professional.

You'll also choose a 'specialised topic' - a **real-world project** where you create and deliver novel, elegant solutions with support from experienced faculty and mentors.

Industry alignment runs through the entire programme, including the opportunity to pursue EC-Council certifications and expand your professional network.

Want to find out more? Pick up a prospectus, book a campus tour, visit our website, or just give us a call. Applications for this year and next are open.

Advance your career or prepare for further study knowing you are ready to lead, innovate, and shape technology's future.

With the practical skills and mindset to prove it.
